Seasonality Guide

Timing can make or break an event.

A month-by-month view of when each destination is at its best. Use it to shortlist dates, then talk to us about how peak, shoulder and off-peak periods affect availability, pricing and programme design.

This guide reflects general conditions in the main event regions of each destination. India, Sri Lanka and Nepal in particular vary widely by area and altitude, so we confirm conditions for your specific locations and dates.

WHAT EACH RATING MEANS FOR YOUR EVENT

Rating	What to expect
Ideal	Comfortable weather, the widest range of outdoor options and the strongest demand. Book venues and flights early, and expect peak pricing.
Good	Generally pleasant, with some caveats such as rising heat, early rain or cooler evenings. Often a good balance of availability and value.
Plan carefully	Heat, monsoon or cold can limit outdoor programming or travel. Indoor and covered venues, flexible schedules and buffer time help. Some of these months offer excellent value and quiet venues.

NOTES BY DESTINATION

Destination	Seasonal notes	Festivals and cultural moments
India	Cool and dry from October to March. Heat builds from April. Monsoon runs roughly June to September. Hill regions are pleasant in summer.	Diwali (October or November), Holi (March), Jaipur Literature Festival (January), Pushkar Camel Fair (November)
UAE	Mild and sunny from November to March. Summers are very hot, but well suited to indoor conferences and evening programmes.	Dubai Shopping Festival (December to January). Ramadan and Eid dates shift each year
Sri Lanka	Two monsoons split the year. The west and south coasts are best from December to March, the east coast from April or May to September.	Sinhala and Tamil New Year (April), Kandy Esala Perahera (July or August)
Nepal	Clear skies and mountain views in October and November, and again from March to May. Monsoon runs June to September.	Dashain and Tihar (October and November)
Bhutan	Spring and autumn offer the best views and comfortable temperatures. Winters are cold but clear.	Paro Tshechu (spring), Thimphu Tshechu (September or October)

PEAK, SHOULDER AND OFF-PEAK

Peak months bring the best weather and the highest demand. Shoulder months (often the start and end of a season) can offer strong conditions with better availability. Off-peak months often bring good value, but need more careful programme design. Festival dates change every year, so check them before you fix a date.
